

CO₂ Capture and Storage (CCS)

Co-organisers

CO₂GeoNet - The European Network of Excellence on the Geological Storage of CO₂

Enabling safe and efficient deployment of the CCS technology. 28 research institutes spanning 21 European countries collaborating on joint research, scientific advice, capacity building, and dissemination.

TCCSUA – Taiwan Carbon Capture Storage and Utilization Association

Promoting the technical development of CCS and utilization, helping industries reduce carbon, providing recommendations for domestic regulatory framework, expanding international collaboration, sharing knowledge and communicating with the public in order to reduce emissions and alleviate the greenhouse effect.
